Liverpool latest injuries news today

The man's reasons for travelling more than 160 kilometres during the coronavirus lockdown did not stack up with police. New York Governor Andrew Cuomo asked Pfizer Inc Chief Executive Albert Bourla on Monday whether the state could buy doses of the COVID-19 vaccine directly from U.S. drugmakers. Pfizer, however, told Reuters that such a proposal would first require approval by the U.S. Department of Health and Human Services. With hospitalizations and deaths increasing across the country this winter, we are in footrace with the virus, and we will lose unless we dramatically increase the number of doses that get to New York. Cuomo said in a letter to Pfizer CEOs. Ad+Finance.here.com Split your feedback. We will remove this and make the necessary changes. Mum Reveals How She Earns £1,000 Every Day Working From Home. After her online trading platform was valued at £10 million! Venezuelan authorities issued an arrest warrant for a new member of the board of directors of U.S.-based refining company Citgo Petroleum Corp named by the opposition this month, chief prosecutor Tarek Saab said on Monday. Saab said Jose Ramón Pocaterra was illegally appointed to the board of Citgo, a subsidiary of Venezuelan state oil company Petroleos de Venezuela, and announced charges against him for alleged crimes including conspiracy, obstruction of public function, and obstruction of justice. The opposition took over Citgo in 2019 after the United States, along with dozens of other countries, recognized Juan Guaidó - speaker of the opposition-held National Assembly - as Venezuela's legitimate leader. The Wearable Electronics market will grow by \$41.24bn during 2020-2024VANCOUVER, British Columbia, January 18, 2021 (GLOBE NEWSWIRE) -- MAG Silver Corp. (TSX / NYSE American: MAG) (MAG or the Company) is pleased to announce that Jill Neff has joined the Company as Corporate Secretary. Neff has more than 16 years as corporate secretary, corporate governance and securities regulatory experience, 12 years in particular with public companies in the mining industry. More recently, Ms. Neff served as Corporate Secretary of Sierra Metals Inc., a position she has held since 2013. Prior to that, he was Corporate Secretary for a number of other public companies, including WPC Resources Inc. (now Blue Star Gold Corp.) and TTM Resources Inc. Ms. Neff completed the Paralegal Diploma Program at Capilano University in 2004 and began her career as Paralegal Securities at national law firms including Borden Ladner Gervais LLP and Goodmans LLP. We are thrilled that Jill has joined MAG. said George Paspalas, President and CEO. Jill brings us a very relevant corporate secretary experience, which will play a role as we continue to add value to shareholders and continuously improve our corporate governance. About MAG Silver Corp. MAG Silver Corp. www.magsilver.com. (MAG: TSX/NYSE A) is a Canadian development and exploration company focused on become a major top-level silver mining company by exploring and advancing high-end, district-scale, dominant silver projects in America. Its main focus and assets are the Juanicipio Project (44%), developed in a Joint Venture partnership with Fresnillo Plc (56%). Juanicipio is located on the Fresnillo Silver Trend in Mexico, the world's premier silver mining camp and the Joint Venture is currently building and developing surface and underground infrastructure on the property to support 4,000 tonnes of mining operations per day. Initial underground production was achieved in Q3-2020. In addition, MAG has an expanded exploration program, targeting several highly prospective targets both at Juanicipio Joint Venture and at the Deer Trail 100% revenue project in Utah. On behalf of the Board of Commissioners of SILVER CORP. President, CEO and Director George Paspalas Neither the Toronto Stock Exchange nor NYSE American has reviewed or accepted responsibility for the accuracy or adequacy of this press release, which has been prepared by management. This release includes certain statements that may be considered forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. All statements in this release, other than statements of historical fact are forward-looking statements, including statements that address future mineral production, potential reserves, exploration drilling, exploitation activities and events or developments. Forward-looking statements are often, but not always, identified by the use of words such as seek, anticipation, plan, continue, estimate, expect, may, will, project, predict, potential, targeting, intend, can, might, should, believe and similar expressions. These statements involve known and unknown risks, uncertainties and other factors that could cause actual results or events to differ materially from those anticipated in such forward-looking statements. While MAG believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in the forward-looking statements include, but are not limited to, changes in commodity prices, changes in mineral production performance, successful exploitation and exploration, continued availability of capital and financing, and economic, market or general business conditions, political risks, currency risks and capital cost inflation. In addition, forward-looking statements are subject to a variety of risks, including that incomplete data and considerable additional work will be required to complete further evaluation, including but not limited to engineering and socio-economic and investment studies. A growing number of goods projects rejected contracts to move goods from France to the UK in the second week of January, while prices rose, according to data showing the impact of Brexit and COVID-19 on UK trade. Transporeon, a German software company that provides networks to suppliers, retailers, shippers and more than 100,000 logistics service providers, said prices rose 47% compared with the third quarter of 2020. Prices have risen 39% in the first week of January, Chantilly, VA, Jan 18, 2021 (GLOBE NEWSWIRE) -- Associa Community Management Corporation (CMC) announced the recent promotion of Bryant Phillips to division director of the HOA. Phillips has extensive and diverse knowledge of association management in large-scale homeowner associations, thriving communities, and condominiums. Prior to his property management experience, Mr Phillips spent 15 years in the hospitality industry. He joined CMC in 2015, at which point he managed a community of 1,000+ HOA units and a 19-story luxury 19-story master association in Northern Virginia. In both roles, Mr. Phillips oversees day-to-day operations, manages state-of-the-art facilities, leads teams in maintaining properties of the highest standards, and ensures that association rules and regulations are followed. In his new role as director of the HOA division, Mr. Phillips will continue to ensure that the highest level of service is provided to clients. Mr Phillips also brings an exemplary background in industry volunteering. For the past five years, he has served as co-chairman of the CMC Community Association expo planning committee. Since 2016, he has led the exhibition of charity vendor Associa Cares, helping raise money for those affected by man-made and natural disasters. Bryant is proactive, solution-driven, and on customer service, all of which have made him a highly valued member of the team since he joined the CMC family, said John Tsitos, CMC@, CMC@, Cmc President. His experience and commitment to unparalleled client support significantly benefits the associations and residents we serve on a daily day. We are thrilled to see Bryant embracing new responsibilities in this directorial role. With more than 200 branch offices across North America, Associa provides untraceable management and lifestyle services to nearly five million people worldwide. Our 10,000+ team members lead the industry with unparalleled trailblazing education, expertise and innovation. For more than 40 years, Associa has provided solutions designed to help communities achieve their vision. To learn more, visit www.associaonline.com. Smart Pole Market will grow by \$7.97 billion over 2020-2024Nick Kyrgios has attacked Novak Djokovic and Vanessa Sierra over the Australian Open quarantine disaster. (Bloomberg) -- The Canadian province that invested \$1.1 billion of taxpayer money in the controversial Keystone XL project is now considering selling pipelines and materials to try to reneadiser some funds. If the project ends, there will be assets that could be sold, such as large amounts of pipelines, Alberta Premier Jason Kenney said at a press conference Monday. That will offset construction costs. With Joe Biden set to be sworn in this week, the U.S. president-elect's campaign promise to cancel a crude pipeline license haunts Canada's oil sands industry. The decision may come through executive action on his first day in office, CBC News reported on Sunday, citing people not identified. Alberta, home to the world's third-largest crude reserves, has struggled for years with a lack of pipeline capacity to deliver its crude to the U.S. Gulf Coast and other markets. Keystone XL from TC Energy Corp. is one of the pipelines that the industry may be relying on to complete. The cancellation of Keystone XL would cost Alberta taxpayers more than C\$1 billion (\$785 million), Kenney said. In March, the Kenney government agreed to fund the first year of construction with a \$1.1 billion investment and to guarantee a \$4.2 billion loan as a way to start construction. The Province and TC Energy have a strong legal basis for obtaining damages through the courts, Kenney also said. For more than a decade, the Keystone XL project was first rejected by former President Barack Obama because of concerns about climate change, but his successor Donald Trump issued a new permit when he took office The incoming Biden administration owes its respect to Canada for at least sitting down and discussing the project before taking action, Kenney said. The Canadian Petroleum Producers Association said that cancelling the project would kill thousands of jobs and offered to work with stakeholders to find a solution to complete the pipeline. Follow all the live action from the Emirates Stadium! is two weeks until the end of the mid-season window we still haven't seen a big move by one of the Premier League's biggest clubs, with many of them instead focusing on getting out. Mesut Ozil's move to Fenerbahce is expected to be finalised soon. Chelsea epitomise that, having spent big on a number of new stars in the summer, and all the speculation today is over Fikayo Tomori's proposed loan move to AC Milan and a surprise option to buy, while Danny Drinkwater is finally heading for the exit. NOT FOR DISTRIBUTION TO THE UNITED STATES NEWS WIRE SERVICE OR FOR DEPLOYMENT IN THE UNITED STATES TORONTO, January 18, 2021 (GLOBE NEWSWIRE) -- Bluerush Inc. (BlueRush or Company) (TSX-V: BTV), a personalized video software company that emerged as a Service company (SaaS), is pleased to announce that due to high demand, the company increased the maximum increase in non-broker personal placement financing previously announced to a maximum of \$4.5 million units (Units or Units) from the Company (Offering). As such, BlueRush is now proposing to raise gross in accordance with the offer yield of at least \$2,000,000 and a maximum of \$4.5 million through the issuance of a minimum of 19,047,619 Units and a maximum of 42,857,142 Units at \$0.105 Units at \$0.105 Per Unit. Each Unit consists of (i) one (1) common share of the Company, and (ii) one (1) transferable general share purchase warrant. Each warrant shall entitle its holder to acquire one additional common share of the Company at a price of \$0.18 per share until the thirty-sixth (36th) month from closing. The expiration of the warrant may be expedited by the Company at any time after the four (4) month anniversary of the issuance of the warrant and before the expiration date of the warrant if the weighted volume of the Company's average common stock price on the TSX Venture Exchange (Exchange) is greater than \$0.22 for every twenty (20) consecutive day of trading, at which time the Company may, within ten (10) business days, accelerate the warrant expiration date by issuing a press release reduction of the warrant term in which the warrant will expire on the 20th calendar day after the date of the press release. Net result of will be used by the company to continue to accelerate the growth of subscription income, R&D and for working capital. In addition, the Company announces that holders of Debentures 2018 (as defined in the Company's January 15, 2021 News Release) will now have until 5.m:00 pm (Toronto time) on January 20, 2021 to receive the Conversion Offer (as defined in the Company's January 15, 2021) Corporate News Release). All securities issued in accordance with the Offer will be subject to a four-month detention period. Closing transactions is subject to, among other things, prior approval from Exchange. About BlueRush BlueRush develops and markets IndiVideo™, a disruptive and award-winning interactive personal video platform that drives return on investment throughout the customer lifecycle, from increased conversions to more compelling statements and customer service. IndiVideo enables BlueRush clients to capture knowledge and data from their customers' video interactions, create new customer insights and drive data. For more information, please www.bluerush.com. Forward-Looking Statements Certain statements contained in this press release may constitute forward-looking information as such terms are defined in applicable Canadian securities laws. Words may, will, can, should, potentially, be, seek, intend, plan, anticipate, believe, estimate, expect and similar expressions as they relate to the Company, including the closing of the Offer and conversion of debt, intended to identify forward-looking information. All statements other than statements of historical fact may be forward-looking information. Such statements reflect the Company's current views and intentions with respect to future events, and current information available to The Company, and are subject to certain risks, uncertainties and assumptions, including: acceptance of subscription agreements and subscription results; the closing terms of the Offer fulfilled or waived; approval of the Company's board of directors and Stock Exchange approval. Material factors or assumptions are applied in providing forward-looking information. Many factors may cause actual results, performance or achievements that such forward-looking information may express or implied to vary from those described herein if one or more of these risks or uncertainties materialize. These factors include, without limitation: changes in the law; the ability to implement business strategies and pursue business opportunities; state capital markets; availability of funds and resources to pursue operations; new business model; dependence on key suppliers and local partners; competitions; the outcomes and costs of any litigation; general economic, market and business conditions; risks associated with COVID-19 including recommendations, orders and measures of government authorities to pandemics, including travel restrictions, border closures, unannounced business closures, quarantine, self-isolation, shelter and social distancing, disruption to markets, economic activity, financing, supply chains and sales channels, and worsening general economic conditions including the possibility of a national or global recession; and risk factors discussed or referenced in disclosure documents filed by the Company with securities regulatory authorities in certain provinces of Canada and available in www.sedar.com. If any factors affect the Company unexpectedly, or if assumptions underlying forward-looking information prove to be incorrect, actual results or events may differ materially from predicted results or events. Secret language expert: How to start learning any language in just 15 minutes a dayTunisian Police said on Monday they had arrested about 1,000 people after several nights of protests as rights groups warned against using excessive force and witnesses said demonstrators clashed with security forces in the town of Kasserine. Police fired tear gas as young children burned tires and threw rocks, eyewitnesses in the impoverished town said, hours later demonstrators gather in the capital Tunis to demand the release of prisoners. Protests and clashes clash the police follow the 10th anniversary of the revolution that brought democracy but some material gains for most Tunisians, and growing anger at chronic unemployment and poor state services. (Bloomberg) -- Treasury Secretary nominee Janet Yellen on Tuesday stepped into a new role after more than a quarter of a century in government: a salesperson for economic policy after years of defending the Federal Reserve's thinking and actions. Tuesday's Senate Finance Committee.m hearing is likely to feature topics from foreign exchange policy to taxes, but will also serve as the first congressional forum where lawmakers will examine President-elect Joe Biden's \$1.9 trillion Covid-19 aid plan. Yellen will tell them that low borrowing costs mean it's time to act big, according to her prepared statement. Read more: Biden's Top Cabinet Picks -- which OneYellen May Not Have on Weekdays OneYellen, 74, needs to sell a package that includes minimum wage increases and a major expansion in family and medical leave -- social safety net programs that have fueled Republican opposition. Democratic lawmakers, who will soon enjoy majority control of the chamber, are set to press their own priorities. For Yellen, a former economics professor who would be the first woman to run the Treasury if confirmed, it is a marked difference from her previous service as Fed chair and vice chairwoman, and running the Federal Reserve Bank of San Francisco. He also heads President Bill Clinton's Council of Economic Advisers, which he runs more as an economic think-tank for the administration than a policy-setting group. Read QuickTake: Biden's Stimulus Hopes May Depend on "Reconciliation"Time he comes to Congress as a political appointee in an environment charged by the possible impeachment trial of Donald Trump and the impact of this month's violence on the Capitol. We don't know what kind of salesperson he'll be in the political context - he's never had to do that before, said Tony Fratto, who worked in the Treasury and White House during the George W. Bush administration. He needs to find the best way to win support for administration policy, he said. The stakes of getting stimulus through Congress, where Democrats have control of the vice presidential tiebreaker in a 50-50 partisan split, are high. There are still nearly 11 million unemployed Americans in an economy that continues to be battered by pandemics. A decline in payrolls and retail sales in December left the nation limping into the new year. More than 17 million people say they have little or no confidence in their ability to pay rent next month. Yellen, who is due to participate virtually in the hearing, will tell the committee that the U.S. economy has suffered from deep inequality - and that the long-term goal of the administration is to create more prosperity for more people. Well before Covid-19 infected one American, we lived in the form of K K one in which wealth is built on wealth while working families fall further and further behind. Yellen will say, according to the prepared text of her remarks obtained by Bloomberg News. This is especially true for people of color. Here are some other key issues he can expect to address:Deficit FinancingYellen will echo the case made by Biden that low borrowing costs are an opportunity for public spending to boost the economy. Right now, with interest rates at historic lows, the smartest thing we can do is act big, he said, according to the prepared text. But Yellen is likely to be asked what her safe limit is, now that debt is on the verge of exceeding 100% of GDP. He will acknowledge his appreciation of the country's debt burden, according to the statement. Respected by lawmakers on both sides of the aisle, Yellen may be crucial in making the case for significant additional loans, said Julia Coronado, a former Fed economist and president of MacroPolicy Perspectives. He'll be there to assuage concerns that we're going in a radical direction. Yellen could also be asked about debt issuance tactics, and whether she agrees with former Treasury Secretary Robert Rubin in an effort to tilt borrowing against older securities. That could lock in cheap funding, though many bond dealers have been skeptical about introducing 50-year or 100-year bonds. Read More: Mnuchin Eyes 100 Years of Wall Street Debt May Not Be Ready forFed CoordinationSteven Mnuchin, the outgoing Treasury secretary, issued five emergency Fed facilities in late December, something he said was required by language in the March 2020 Care Act that governs them. Democrats strongly disagree. Republicans are trying to prevent a revival of the program with language included in the December pandemic relief bill. It's unclear whether the Biden administration sees a role for the fresh Fed initiative. READ MORE: Republicans Will Continue to Try to Limit FedYellen's Emergency Lending Power More broadly may be asked about the Fed's intention to keep buying large amounts of Treasuries, and whether the central bank allows excessive government borrowing. He's going to have to work out a vivendi mode with the Fed that doesn't look like a conspiracy and can be explained by Congress, said Adam Posen, president of the Peterson Institute for International Economics.Currency PolicyAfter years of mixed messages about U.S. currency policy, and sometimes direct support from a weaker currency, Yellen faces some pressure to restore the dollar's strong embrace. But he has also in the past highlighted the negatives of strengthening the greenback. Yellen, in her testimony, will affirm the U.S. commitment to market-determined exchange rates and make it clear the country is not looking for a weaker dollar competitive advantage, the Wall Street Journal reported on Sunday, citing Biden transition officials. Biden's transition spokesman could not confirm the report. Treasury supervise the half-yearly assessment of the foreign exchange policies of U.S. trading partners, determining whether they manipulate their currencies. Mnuchin made the three designations -- for China from August 2019 to January 2020, and from mid-December 2020 for Switzerland and Vietnam.Read more: U.S. Tags Switzerland Currency Manipulator, Keeps China on WatchChina Ties While Treasury is not directly responsible for trade negotiations, the department is typically involved, and the secretary in the past has been a leading economic official in the administration's involvement. It remains unclear whether the Biden administration plans to resurrect some kind of regular dialogue and what Yellen's role is in terms of what framework as well as possible. Regulation, the Tax Secretary of the Treasury also usually has an important role in setting financial regulations and tax policies, although many other officials are involved and can lead. Biden's administration is expected to strengthen oversight of financial institutions and he has promised to roll back many of Trump's tax cuts. Yellen will also chair the Financial Stability Oversight Council, a cross-agency panel designed to monitor risks. He could face questions about strengthening his powers or oversight, and whether climate change could become a new area of surveillance. (Update with Yellen's comments in paragraph 12. An earlier version of this story corrected the date of the WSJ report at the hearing.) Parliament voted 278 to 0 in favour of keeping top-up payments of 20 pounds (\$27) a week, but the vote was symbolic and did not force the government to act.

Johnson told his MPs to abstain in the vote, after a debate that renewed attention on whether his government was doing enough for people on low incomes after a damaging row over free school meals for children in need. Ads•Quantum AnatomyPiat you for your feedback. We will remove this and make the necessary changes. It is hoped that Quantum AI will help change lives as we know it. PARIS and NEW YORK, January 18, 2021 (GLOBE NEWSWIRE) -- Quantum Genomics (Euronext Growth - FR0011648971 - ALQGC), a biopharmaceutical company specializing in developing new classes of drugs that directly target the brain to treat hard-to-treat hypertension and heart failure today announced the launch of its Phase III REFRESH study difficult to treat (1) or resistant (1) This new study is part of the clinical development of Phase III Fribastat and aims to assess long-term safety as well as efficacy three months after a single daily dose of fribastat 1000mg in the treatment of resistant hypertension We are excited to launch this important new study as a precursor to the potential market approval of single-dose fribastat, which we believe to be the best regimen for chronic treatments that are resistant to difficult-to-treat hypertension, said Jean-Philippe Milon, Chief Executive Officer at Quantum Genomics. The study will also provide long-term safety data in accordance with the FDA-backed Quantum Genomics development plan. (3) This multicenter multinational study will enroll 750 patients with hypertension who are difficult to treat or resistant in Europe, Canada, the US as well as collaboratively in Asia with our commercial partners in China, Taiwan and South Korea. For the first random three-month period, 750 patients will receive a fribastat (1000mg once a day) or a placebo, on top of their current therapy. The main endpoint is the reduction of systolic automatic office blood pressure (AOBP) from the baseline. After this first period, subjects will be treated and acted upon for six months (and 12 months for 100 patients) to assess long-term safety, data that is mandatory for New Drug Applications (NDA) for chronic treatment. Selection of the site is about to begin, and the submission of regulations to competent authorities and ethics committees is in preparation for each country. The first patient recruitment is planned in Q2 2021 and six months of efficacy and safety outcomes are expected for mid-2023, in time to submit a New Drug Application by 2023. Study costs are budgeted and financed thanks to a partnership signed by Quantum Genomics. (1) The patient is not controlled even though there are two classes of antihypertension, including diuretics, with the maximum dose tolerated. (2) The patient is not controlled despite at least three classes of antihypertension, including diuretics, with the maximum dose tolerated. (3) FDA: Food and Drug Administration, U.S. Regulatory Authority. About Quantum Genomics Quantum Genomics is a biopharmaceutical company specializing in the development of a new class of cardiovascular drugs based on inhibition of aminopeptidase A brain (BAPAI). Quantum Genomics is the only company in the world exploring this innovative approach that directly targets the brain. The company relies on 20 years of academic research from the University of Paris-Descartes and a laboratory directed by Dr. Catherine Llorens-Cortes at the Collège de France (French National Institute of Health and Medical Research (INSERM)/ Scientific Centre for National Research (CNRS)). The goal of Quantum Genomics is to develop innovative treatments for treatments that are complex, or even resistant to, cases of hypertension (about 30% of patients have poor control over their condition or receive ineffective treatment) and for heart failure (one in two patients diagnosed with severe heart failure dies within five years). Based in Paris and New York, Genomics is listed on the Euronext Growth exchange in Paris (FR0011648971- ALQGC) and is traded on the OTCQX Best Market in the United States (symbol: QNNTF). Cryptocurrencies could be hurt by an exodus of investors following the trend unless it can break above \$40,000 soon, said a team including Nikolaos Panigirtzoglou. Demand patterns for bitcoin futures and the \$22.9 billion Grayscale Bitcoin Trust will help determine the outlook, they added. The flow to Grayscale Bitcoin Trust is likely to need to maintain a \$100 million-a-day pace over the coming days and weeks for such an escape to happen, strategists wrote in a note on Friday.Traders seeking clues about investors' appetite for risk have been gripped by Bitcoin's stunning rally and slid 10% from a record nearly \$42,000 on Jan 8. The cryptocurrency boom since March has reflected the ebullience of financial markets being inundated with stimulus - as well as concerns about whether profits will eventually prove fleeting. JPMorgan strategists say Bitcoin was in the same position at the end of November, except with \$20,000 as a test. The flow of institutional investment into Grayscale's trust helped the world's largest cryptocurrency expand its rally, they wrote. Traders following the trend could disseminate last week's correction and signal momentum will naturally rot from here until the end of March if the price of Bitcoin fails to break above \$40,000, they said. Bitcoin fell 1.4% to \$36,014 as of 3:25 p.m. in London on Monday.Exactly what was driven throughout the year almost fourfold in Bitcoin prices remained murky. Commentators have cited day traders, wealthy buyers, hedge funds, companies and even signs of interest from long-term investors such as insurers.' Dread to Think'Some, like Chris Iggo, remains skeptical of Bitcoin's appeal to large institutions. I am afraid to think what most risk officers would think about it being in a core investment portfolio, wrote the chief investment officer of core investment at Axa Investment Managers in a note. In order for assets to be considered in a long-term investment portfolio, one must be able to attach some fundamental intrinsic value to them. Bitcoin supporters argue it is maturing as a hedge for the dollar's weakness and the possibility of faster inflation in a recovering global economy. Others say: the decisive fixed speculative boom is followed by the breast. Read more: Does The Bitcoin Boom Mean 'Better Gold' or a Bigger Bubble?
